A & P Revealed Features

• An interactive cadaver dissection experience
• Unique multimedia study aid designed to help learners explore human anatomy using cadaver specimens and develop mastery of physiology concepts through animation
• Digital dissections allow unlimited drill and practice anytime, anywhere
• Detailed information and audio pronunciations build anatomical knowledge
• Comprehensive quizzing reinforces learning
Users select the mode they want to review
For each system of the body, learners dissect, view, or take a quiz.
Animations guide users through content visually and with audio.
Dissections: Select body region, body position, and organ system
Dissections: Select group to dissect, such as the back, limbs, lower limbs, or neck
“Peel back layers” using the red bars
Move the bars down to reveal different layers
Place the curser over the red button to show the image name/structure
Place curser over key term in far left bottom box to reveal structure info and identify location, description, and function.
Learn pronunciation of key terms via the brown box, lower left
Detailed information outlined below
Quiz options, a lab practical or multiple choice test, help learners retain new information.
