Register for a Personal UpToDate Account

South College faculty, staff and students can create a personal UpToDate account on the library subscription. This account allows users to sign in directly to the UpToDate website as well as the UpToDate app. A personal account also allows users to accrue CME credits while searching UpToDate.

**UpToDate requires users to be on campus and connected to the network to register for an account.**

To register for a personal account, select “UpToDate” in the Databases menu of the library homepage and click “Go”.

Log in to the library subscription with your Canvas username and password.

On the UpToDate search page, select “My Account” in the “South College User” menu.

On the following screen, click the “Click here to register” link.
Register for a Personal UpToDate Account

Complete the registration form using your South College email address.

On the following page, accept the license agreement to complete your registration.

Connect your Canvas username and password to your UpToDate account:

Immediately after registering for an UpToDate account, run a search, open a topic and browse the topic content.

Completing this search and viewing a topic will allow UpToDate to recognize your Canvas login and automatically sign you in to your UpToDate account each time you login.

You will receive an email from UpToDate confirming your registration. The email will also include information about the UpToDate app. Once you have registered, you may download the app and sign in with your UpToDate account username and password.

Please note, UpToDate requires users to renew their account every 90 days by signing in to the account while on campus.

If you lose your UpToDate username or password, or need assistance with the UpToDate personal account, contact UpToDate at:
